

## Technical parameters

Each slab dimensions are 320 x 156 cm / 125,98 x 56,69 in with net surface 4,94 sqm / 53,17 sqft (i.e. 318,5 x 155 cm / 125,39 x 61,02 in). Standard thicknesses are 20 mm and 30 mm / 0,78 in and 1,18 in.

### Dimensions of slabs/net surface

320 x 156 cm  
125,98 x 61,41 in

### Slab thicknesses

### Standard surface

### Weight (may differ for various materials)

Thickness	Weight of 1sqm/1sqft	Weight of one slab
20 mm / 0,79 in	55 kg / 121 lb	270 kg / 595 lb
30 mm / 1,18 in	80 kg / 176 lb	395 kg / 871 lb

## Product maintenance

- in order to safeguard the long-term gloss it is not recommended to regularly cut food or other products directly on the surface
- be cautious while using special knives and sharp objects (steak knives, grill needles and spikes, etc.)
- proceed with caution when handling utensils and other metal objects especially on the edges or corners of the surface (even the hardest stone can be damaged by heavy objects)
- hot objects are not recommended to be placed directly on the surface without the use of an insulating pad
- hot iron/stainless steel utensils, cigarettes, lamps, etc. can cause significant material damage
- the stains caused by liquid substances (coffee, tea, oil, natural juices from fruits and vegetables, blood, kitchen cleaning agents etc.) should be removed by water as soon as possible
- avoid using of cleaning agents containing hydrochloric acid, phosphoric acid, sodium hydroxide, hydrogen peroxide, as these cleaning additives can cause irreversible changes to the material's color
- it is possible to treat TechniStone® material with non-concentrated cleaning agents
- it is recommended to use products from the following companies for frequent maintenance: Technistone Orange Cleaner, Fila, Bellinzoni, HG International, Moeller Chemie, Lithofin, Akemi, RAKO, Tenax, etc.
- to increase protection against stains it is recommended to use Technistone's TS Protection
- it is necessary to observe and respect the manufacturers' recommendations as well recommended application process of cleaning agents; after using the cleaning agent it must always be removed from the surface and washed thoroughly with water
- TechniStone® surface is not resistant to strong alkalis and even briefly exposure to hydrofluoric acid

For more information about the maintenance and warranty of TechniStone® material, visit [www.technistone.com](http://www.technistone.com).

### Slabs storing

To avoid warping of TechniStone® slabs they must be stored vertically on a compact stand. The rear side must fully lean on the stand and no part shall overlap unsupported. Slabs must be protected from UV rays.

## Noble Linea

Fragile lines can be an amazing enhancement, as well as the distinctive veins inspired by the beauty of marble, all coming together in **TechniStone®** quartz. Set on a cream-white background, thin lines diverge into a tangle of bristly curls that enhance the liveliness of any interior. A line to define the beauty of detail, subtle and delicate. Without clear lines, there are no clear limits.

**TechniStone®** quartz knows no boundary. The Noble Collection's playful Linea adds modesty with immaculate features. High resistance to scratches, stains and bacteria, strength and water resistance make **Noble Linea** the leading products in the market; suitable for kitchens, bathrooms and other household areas. Gentle Linea is a great choice for those who prefer the colorful tones of the dominant areas of the interior and, on the contrary, like to experiment with distinctive accessories.

everlasting beauty **TechniStone®**
