Product maintenance

- in order to safeguard the long-term gloss it is not recommended to regularly cut food or other products directly on the surface
- be cautious while using special knives and sharp objects (steak knives, grill needles and spikes, etc.)
- proceed with caution when handling utensils and other metal objects especially on the edges or corners of the surface (even the hardest stone can be damaged by heavy objects)
- hot objects are not recommended to be placed directly on the surface without the use of an insulating pad
- hot iron/stainless steel utensils, cigarettes, lamps, etc. can cause significant material damage
- the stains caused by liquid substances (coffee, tea, oil, natural juices from fruits and vegetables, blood, kitchen cleaning agents etc.) should be removed by water as soon as possible
- avoid using of cleaning agents containing hydrochloric acid, phosphoric acid, sodium hydroxide, hydrogen peroxide, as these cleaning additives can cause irreversible changes to the material's color
- it is possible to treat TechniStone® material with non-concentrated cleaning agents
- it is recommended to use products from the following companies for frequent maintenance: Technistone Orange Cleaner, Fila, Bellinzoni, HG International, Moeller Chemie, Lithofin, Akemi, RAKO, Tenax, etc.
- to increase protection against stains it is recommended to use Technistone's TS Protection
- it is necessary to observe and respect the manufacturers' recommendations as well recommended application process of cleaning agents; after using the cleaning agent it must always be removed from the surface and washed thoroughly with water
- TechniStone® surface is not resistant to strong alkalis and even briefly exposure to hydrofluoric acid

For more information about the maintenance and warranty of TechniStone® material, visit www.technistone.com.

Slabs storing

To avoid warping of TechniStone® slabs they must be stored vertically on a compact stand. The rear side must fully lean on the stand and no part shall overlap unsupported. Slabs must be protected from UV rays.

TechniStone®

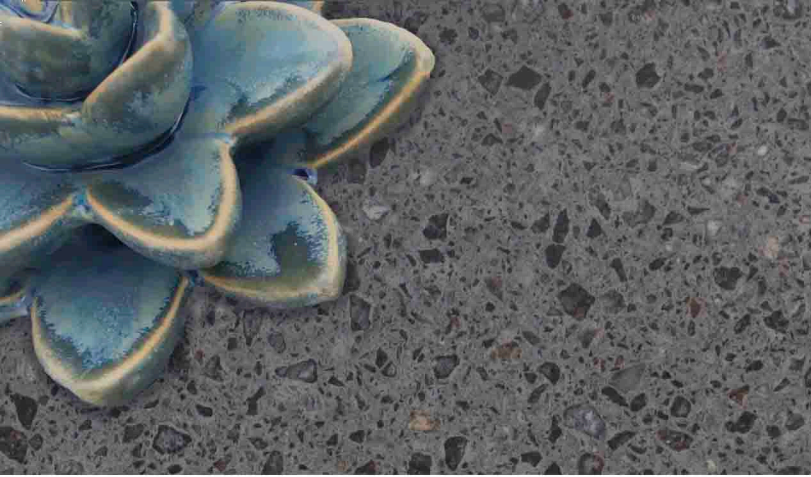

Taurus Terazzo Grey

While it may seem familiar, that charming reminder of what thrilled customers around the world in the not so distant past, the classical and ageless Terazzo motive returns to center stage. Design; popularity in architecture, especially for outdoor terraces... returns. Professionals continue to choose its design to pull-together various materials of interiors, wall coverings, windows, tables, floors. The material has been sought after for its simple richness and its beauty of contrasts.

The variations of blacks, browns and whites are eternal, one allows the other to excel, each having the same room to show, fascinate their audience. In the end, they are united and balanced. Like the distinctive grey **TechniStone®** material base; the name is vibrant - **Taurus Terazzo Grey**. Combination of natural materials supplemented within a single background. One unit, proving its features, completing the unique atmosphere of the interior. The mosaic of colors, the rediscovered sophisticated beauty evolved by nature, technologically processed for our modern requirements, with a convincing expression for aesthetic needs. **Taurus Terazzo Grey** from Technistone will not disappoint with its durability, versatility of interior use and long-lasting impressive beauty. Bet on a classic.
